Az evangélikus-lutheránus egyház három egyházmegyéből áll, központja Kolozsváron található. A népszámlálási adatok szerint híveinek száma 2002-ben volt a legnagyobb, ezt követően csökkent, ám az utóbbi évtizedben ez a csökkenés megállt. 2021-ben az evangélikus-lutheránusok száma 20 026 volt. Az egyházban a magyar nemzetiségűek alkotják a többséget, mellettük jelentős arányban vannak jelen román, német és szlovák nemzetiségűek. A tagság kétharmada városi környezetben él, iskolázottsága az országos átlagnál magasabb: a közép- és felsőfokú végzettséggel rendelkezők aránya nagyobb, míg az alacsony végzettségűek aránya kisebb. Ugyanakkor a népesség idősebb, mint az országos átlag, és az idősebb korosztályok aránya nemek szempontjából kiegyensúlyozottabb, mint más egyházaknál.

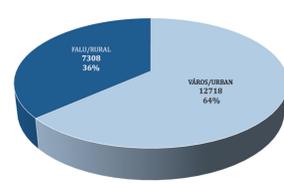

Biserica Evanghelică-Lutherană este compusă din trei eparhii, având centrul la Cluj-Napoca. Conform datelor recensământului, numărul credincioșilor a fost cel mai mare în 2002, după care a scăzut; totuși, în ultimul deceniu această scădere s-a oprit, iar în 2021 numărul luteranilor evanghelici era de 20.026. În biserică, maghiarii alcătuiesc majoritatea, alături de care sunt prezente, într-o proporție semnificativă, naționalitățile română, germană și slovacă. Două treimi dintre membri trăiesc în mediu urban, iar nivelul lor de educație este mai ridicat decât media națională: proporția celor cu studii medii și superioare este mai mare, în timp ce proporția celor cu studii inferioare este mai mică. Totodată, populația este mai în vârstă decât media națională, iar proporția grupelor de vârstă mai înaintate este mai echilibrată din punct de vedere al genului, comparativ cu alte biserici.

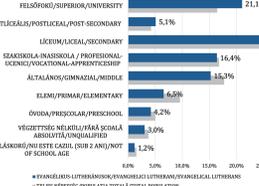

The Evangelical-Lutheran Church is composed of three dioceses, with its center in Cluj-Napoca. According to census data, the number of its members was highest in 2002 and has since decreased; however, this decline has halted in the past decade, and in 2021, the number of Evangelical Lutherans was 20,026. In the church, Hungarian nationals constitute the majority, with significant representation from Romanian, German, and Slovak nationals. Two-thirds of the membership lives in urban areas, and their level of education is higher than the national average: the proportion of those with secondary and higher education is greater, while the proportion of those with lower education is smaller. Additionally, the population is older than the national average, and the proportion of the older age groups is more balanced in terms of gender compared to other churches.
